Summary

Frontend Engineer with 3+ years of experience building high-performance React applications for **web and Smart TV platforms**. Specialized in **UI architecture**, **streaming applications**, **performance optimization**, and **integrating AI-powered features using LLMs, AI agents, and modern AI frameworks**. Delivered measurable business impact, including **25% faster navigation**, **30% fewer unnecessary re-renders**, and advertising features contributing to double-digit revenue growth.

Skills

- **Frontend**: JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, HTML5, CSS3, SCSS, Tailwind CSS, Responsive Design, WCAG Accessibility (a11y)
- **AI & LLMs**: Large Language Models (LLMs), AI Agents, MCP (Model Context Protocol), Hugging Face, smolagents, Prompt Engineering, Tool Calling, ReAct Framework
- **Smart TV**: Samsung Tizen, LG webOS, Tizen Studio, webOS CLI, Streaming Applications
- **Backend**: Node.js, Express.js, REST APIs, GraphQL
- **Cloud & Tools**: AWS S3, CloudFront, Docker, Firebase, Git, GitHub
- **Databases**: MongoDB, MySQL, Redis

Experience

- **Software Engineer II**
  FOX Corporation *November 2026 – Present*
- **Associate Software Engineer — Frontend — Web & Smart TV**
  Xperi Inc. (Remote) *July 2024 – November 2026*
  - Engineered optimized UI components for **PayTV/TiVo** applications on **Samsung Tizen** and **LG webOS**, improving navigation responsiveness by **25%** across Smart TV platforms.
  - Architected a cross-platform **Dynamic Ad Insertion (DAI)** system that improved ad delivery reliability and contributed to an estimated **18% increase in advertising revenue**.
  - Built the **Home Page Hero** advertising platform, delivering dynamic advertisements across browsers and Smart TVs, contributing to a **15% uplift in homepage advertising revenue**.
  - Refactored legacy React class components into modern Hooks-based architecture, reducing unnecessary re-renders by **30%**.
- **Software Engineering Intern — Frontend**
  Xperi Inc. (Remote) *July 2023 – July 2024*
  - Built reusable and responsive **React** UI components for web and Smart TV platforms, improving navigation experience and input responsiveness.
  - Standardized frontend code quality using **ESLint** and **Prettier**, improving code consistency and streamlining code reviews.
  - Enabled low-latency global deployment of frontend assets using **AWS S3** and **CloudFront**.
  - Consolidated multiple startup API requests into a unified **Node.js/Express** endpoint, reducing network round trips and improving application launch performance.
  - Collaborated with engineers to build and deploy production streaming applications on **Samsung Tizen** and **LG webOS**.

Certifications

- **Fundamentals of Agents - HuggingFace**: Completed Unit 1 of the Hugging Face Agents Course, learning the fundamentals of AI agents, LLM-powered systems, agent tool usage, and the Thought-Action-Observation reasoning cycle. Built a functional AI agent using the **smolagents** framework capable of performing tool-based reasoning tasks. *
- **Introduction to Model Context Protocol - Anthropic**: Completed the Introduction to Model Context Protocol course by Anthropic, learning how to design interoperable AI systems using MCP, enabling structured context exchange, tool orchestration, and seamless integration across LLM-powered applications. *

Projects

- **PromptAI - Full-Stack AI Prompt Sharing Platform**: Developed a full-stack platform enabling users to create, edit, delete, and discover AI prompts with keyword search and tag-based filtering. Implemented Google OAuth authentication with user profiles to manage prompt ownership and personalized content. Designed a responsive UI with optimized prompt rendering and instant search interactions for smooth browsing of community prompts.

  Tech: Next.js, React.js, JavaScript, Tailwind CSS, MongoDB *

Education

- **Chitkara University** Punjab, India
  B.E. Computer Science; CGPA: 9.80 *2020 – 2024*
