SUMMARY

Frontend Engineer specializing in building **performant, intuitive, and responsive web applications** across **browsers and Smart TVs** (LG webOS, Samsung Tizen). Experienced in modern JavaScript, React, Next.js, UI engineering, component architecture, accessibility, and streaming-app UI with platform-specific performance optimization. Exploring **AI-powered interfaces**, including **LLM integrations and AI agents**. Proven ability to improve UX, reduce load times, and build scalable frontend systems.

SKILLS

- **Frontend:** JavaScript (ES6+), TypeScript, React JS, Next JS, HTML5, CSS3, SCSS, Smart TV video player experience, Tailwind CSS, Redux, WCAG Accessibility Guidelines, Accessibility (a11y)
- **AI & Agents:** AI Agents, Large Language Models (LLMs), Hugging Face Ecosystem, smolagents, Tool-using Agents, Thought-Action-Observation (ReAct) Loop
- **Smart TV Development:** LG webOS, Samsung Tizen, Tizen Studio, webOS CLI
- **Tooling:** Grunt, Gulp, Webpack, Vite, NPM, yarn, Babel, ESLint, Prettier, Git, GitHub, BitBucket, JIRA Expertise, Version Control
- **Backend (for frontend):** Node, Express.js, RESTful APIs, GraphQL
- **Cloud & DevOps:** AWS S3, CloudFront, Docker, Firebase, Azure, Google Cloud Platform
- **Databases:** MongoDB, MySQL

EXPERIENCE

- **Associate Software Engineer — Frontend — Web & Smart TV**
Xperi Inc. (Remote) July 2024 – Present
 - Engineered UI enhancements for **PayTV/TiVo** Smart TV and browser apps across **Samsung Tizen and LG webOS**, improving navigation responsiveness by **25%**.
 - Implemented **client + server-side Dynamic Ad Insertion (DAI)** enabling personalized ad experiences; improved ad-load reliability across regions and contributed to an estimated **18% increase in ad revenue**.
 - Developed the **Home Page Hero** feature, a highly UI-centric advertising module displaying ads from multiple providers across browsers and Smart TVs, improving ad visibility and generating **15% uplift in homepage ad revenue**.
 - Refactored large React codebases by converting class components to functional components with hooks, reducing unnecessary re-renders by **30%** and improving maintainability.
- **Software Engineering Intern — Frontend**
Xperi Inc. (Remote) July 2023 – July 2024
 - Developed modular, responsive **React UI components** optimized for laptops and Smart TV screens; improved input latency and navigation performance on TV devices.
 - Improved code quality by integrating **ESLint + Prettier**, raising code consistency and reducing PR cycles.
 - Used AWS S3 + CloudFront to deploy static applications with reduced load-latency and global CDN distribution.
 - Built Node.js/Express backend utilities to aggregate API calls into a unified endpoint, **reducing app launch API roundtrips**.
 - Worked closely with Tizen Studio and webOS SDK to debug, build, and deploy streaming apps directly on Smart TV hardware.

CERTIFICATIONS

- **Fundamentals of Agents - HuggingFace:** Completed Unit 1 of the Hugging Face Agents Course, learning the fundamentals of AI agents, LLM-powered systems, agent tool usage, and the Thought-Action-Observation reasoning cycle. Built a functional AI agent using the **smolagents** framework capable of performing tool-based reasoning tasks. 🏆*

PROJECTS

- **PromptAI - AI Prompt Sharing Platform:** Designed and developed a polished, responsive frontend allowing users to create, browse, and search AI prompts with tag-based filtering and smooth UX interactions. Implemented secure Google OAuth and optimized prompt rendering for instant search results. **Tech:** React.js, JavaScript, Tailwind, MongoDB 🏆*

EDUCATION

- **Chitkara University** Punjab, India
B.E. Computer Science; CGPA: 9.80 2020 – 2024
- **Government Model Senior Secondary School** Chandigarh, India
Higher Secondary: Non Medical; Percentage: 94 2018 – 2020
- **Saupin's School** Panchkula, India
Secondary: Maths and Science; Percentage: 93 2005 – 2018
